Water Wise Grade 2 Take a trip to the Museum or
The Museum can come right to your classroom!!

The amazing program “**Water Wise**” offers an opportunity for students to engage in hands-on activities, discussions, demonstrations and displays that will challenge them to consider the importance of groundwater, climate change and environmental stewardship. The **water cycle**, **water ecology** and **water conservation** are all highlighted in this active and fun program. This program is offered **for a small fee of \$3 per student** to school groups through a generous donation from TD Friends of the Environment Foundation & The RBC Blue Water Project
